

Open Data Platform

The next generation of workforce analytics

Crown's Open Data Platform (ODP) enables organisations to access and analyse data through a user-friendly database. As a fully managed cloud service, it offers secure and simplified access to workforce data, promoting insightful analysis for effective data-driven decision-making. The platform also enhances data sharing, allowing integration with Office 365, data lakes, data warehouses, and third-party applications.

Our fully configurable Workforce and Duty Management systems adapt to your unique processes, backed by expert support delivering actionable insights.

Empower your insights

Understand your workforce dynamics with analytical templates from Crown. Develop visualisations and reports based on these templates, and leverage the Crown ODP navigator for new insights and analysis.

Powered by Microsoft Power BI

ODP supports Microsoft Power BI as a powerful and popular reporting tool. Power BI capability enables data to be shared via Excel, PowerPoint and Teams facilitating analytical data sharing across the organisation.

Key features

Every business has unique processes and requirements, which is why our customers value the flexibility of our fully configurable Workforce and Duty Management Systems. Supported by a UK-based development team and knowledgeable service desk, we foster long-term partnerships to tailor the system to your needs. With the Crown ODP capability, organisations can transform data from multiple sources into actionable insights, enhancing overall value.

Trusted by leading global organisations and 40% of the police forces in UK&I.
